EDUCATION

BFA, Electronic Design & Multimedia

The City College of New York, Magna Cum Laude

Foundation in visual systems, typography, and spatial hierarchy, the graphic design rigor underlying my product work today.

Product Design Certificate

Designlab UX Academy

End-to-end UX methodology: research, usability testing, and product design from concept through handoff.

TOOLKIT

Figma, Adobe Creative Suite, Cursor, HTML/CSS/JS, AI-Assisted Design Tools

LANGUAGES

English, Spanish

EXPERIENCE

Freelance Creative & Product Director

2025 - Present

Diapulse Technologies Corporation

Directed the comprehensive rebrand of Diapulse, a 30-year legacy medical device, as the sole designer leading the visual identity system, information architecture, and full website overhaul. Partnered with an industrial designer on the physical product's form and color, and rebuilt the software interface using detailed wireframes. The new brand was fully adopted across all physical and digital touchpoints, with the updated clinical software now live in active use.

Creative Lead & Designer

2024 - 2026

Hush Tech LLC

Led end-to-end brand and product design for the WAVE medical device. Established the foundational visual identity and design system, including the UI/UX for an ePRO app designed for protocol-compliant clinical trial data capture. Executed the complete design of large-scale trade show booth and marketing materials slated for the brand's debut at the ACOG healthcare conference.

Creative Director

2019 - 2023

Quest Technologies LLC

Served as Creative Director for a small team of two developers and a junior designer, personally driving all design decisions and contributing front-end development. Led brand identity and web product design for a roster of 20+ business clients, including healthcare organizations, hand-coding cohesive visual systems spanning websites, marketing materials, and digital touchpoints. Built reservation- and appointment-enabled websites that let clients' customers self-schedule directly online, eliminating phone-dependent booking and streamlining business-to-client communication. Delivered projects on an average three-week turnaround depending on scope, sustaining strong client retention through ongoing updates and platform upgrades.

Web Communications Coordinator

2017 - 2019

Hostos Community College

Managed large-scale digital communications reaching audiences of up to 20,000, and led a New York citywide MTA advertising campaign for the college's 50th anniversary. Also designed for major campus events, including full-wall wrapping installations across all campus lobbies and window designs for the Campus Registrar's Office.

Freelance Web Designer

2015 - 2019

Hostos Art Center

Designed promotional campaigns across print and digital for the center's concert and theater productions, driving ticket sales, and maintained the center's website through ongoing HTML and CSS updates.
